Re: August 7, 2014, Request to Provide Information Pursuant to Clean Air Act

Dear Ms. Topinka:

On August 11, 2014, Savoy Energy, L.P. (Savoy) received the EPA's Request to Provide Information Pursuant to Clean Air Act, dated August 7, 2014.

Savoy promptly began gathering information and documents to respond to the requests in Appendix B. After carefully considering each of the nineteen separate requests and beginning the process of information and document gathering, it is clear to Savoy that it will be unable to respond thoroughly, accurately, and completely within thirty days allotted in the Request to Provide Information. Savoy is a small company, with only 13 employees working in its corporate office. Moreover, 4 of those employees are new to Savoy and as the request came in August several people have been out of the office as previously planned. The nineteen requests, in addition to being numerous, are quite extensive and very broad. Responding to the requests has tied up and will continue to tie up a large portion of the time and resources of Savoy's workforce and has required Savoy to employ third party contractors to assist in gathering the information and documents.

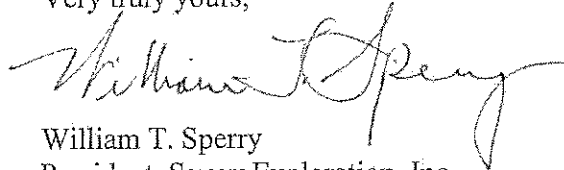

Savoy intends to respond to each and every one of the nineteen requests thoroughly, accurately, and completely. However, doing so will require more than thirty days. Thus, Savoy requests an extension of at least thirty additional days beyond the current due date of its Response. As noted above, Savoy received the Request to Provide Information on August 11, 2014. An additional thirty days would make Savoy's Response due October 10, 2014.
